BOMBARDIER FLIGHT DECK FOR iPad®

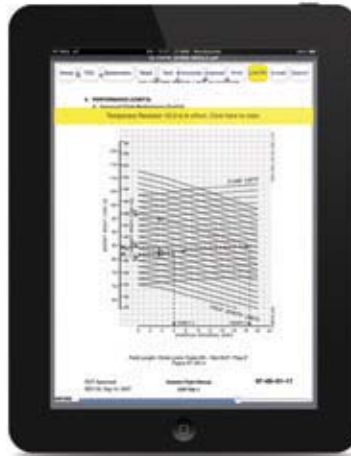

Bringing paperless efficiency to pilots

No more carrying pounds of aircraft manuals and documents on-board. No more waiting for Temporary Revision (TR) updates. With the Bombardier Flight Deck® application, Bombardier® aircraft pilots can enjoy the benefits of going paperless by being able to store and access manual data and other documentation instantly from their iPad® - without WiFi. No other solution combines automatic TR updates, user control of content and aircraft serial number-specific information into one application. Bombardier Flight Deck also includes all required FAA, EASA and TC compliant audit trails for paperless operations.

All Documents. All Accessible. All in One Place.

Fast and easy, you can drag and drop electronic versions of aircraft documents, manuals and forms into online folders. Pilots simply enter a license code, then push a sync button on the iPad® and the updated documents are automatically downloaded and cataloged. In less time than it takes to send a fax, pilots can sign documents, add text and email it to the fleet manager.

Automatic Revision Updates

No more manually inserting revisions or Temporary Revisions (TRs) into Bombardier's flight manuals. These are automatically inserted into the correct sections and distributed across every iPad® in the operator's fleet by Bombardier Technical Publications. Valuable time is saved and pilots are always ready to fly in accordance with the latest regulatory requirements.

e-Touch Efficiency

You can find any document in your library with the touch of a button. Fill out and send checklists and forms, and organize your documents by library, publication, folder and more. The Bombardier Flight Deck application lets you do it all, instantly and securely with optimal reliability, using Cloud technology to store and deliver documents to your iPad®.

Pricing and Availability

For pricing and availability, or to order the Bombardier Flight Deck application for Learjet®, Challenger® or Global® aircraft, please contact Bombardier Technical Publications by email at bbad.pubs.dist@aero.bombardier.com or by telephone at toll free 1-866-538-1247 or +1-514-855-2999 and choose option 4.

For more information on the Bombardier Flight Deck application, please visit <http://cic.bombardier.com>.
